INTRODUCTION

Newline Engage is an easy to use interactive teaching tools, which comes with lesson creation tools and subject specific content and interactive activities, which allow for the quick and easy creation of interactive lessons, combine images, shapes, text, video, PDF, PPT, files into one application that can be presented to your students on the whiteboarding stage.

Make use of all your existing lessons created in other whiteboard software as engage allows import of .IWB file format as well as SMART Notebook files and Promethean Flipchart files.

1.SOFTWARE ACTIVATION AND USER SETTINGS

1.1 Entering the licence key

Newline Engage requires a 20 digit licence key to operate for longer than the 30 day trial period available on installation, once entered the software will upgrade automatically if required and the licence is perpetual so will not expire, each licence key can be used up to 10 times, allowing teachers to install on multiple devices that they own.

1.2 Language and standard settings

Newline Engage requires a 20 digit licence key to operate for longer than the 30 day trial period available on installation, once entered the software will upgrade automatically if required and the licence is perpetual so will not expire, each licence key can be used up to 10 times, allowing teachers to install on multiple devices that they own.

2. SCREEN MODES

The software comes with 3 different screen modes that you can work in, you are able to set the software to start in either preparation mode or presentation mode from within the preferences menu.

2.1 Preparation mode

This is the main mode for creating and editing your lessons on a desktop or laptop device, although you can also edit content created on your newline interactive flat panel you are able to easily navigate your content using the slide sorter and content sensitive preferences settings panel.

🤯 Newline Engage File Edit 🛛 🕤 🗟		Untitled ~		- X

2.2 Presentation mode

This is the main mode for presenting your lesson on the newline interactive flat panel and removes the page sorter and preferences settings to give you more room to present, this gives you access to a floating toolbar for easy access to the main engage tools, the canvas is infinite and can be moved around easily.

You can enter the presentation mode by clicking on the play button on the top toolbar and selecting either to start the show from the current slide or from the beginning.

	61				Ş	R	٢	6	포	-	×

Presentation Mode View

2.3 Desktop mode

This mode is enabled through the presentation mode by selecting the pen icon and enables you to navigate and annotate over any other desktop program or web browser and then capture images straight back to the Engage canvas.

Options: move toolbar, mouse mode, Pen tools, erase ink, go back, go forwards, save to whiteboard or desktop, return to engage presentation mode.

3. THE BASICS OF CREATING YOUR LESSON

Newline Engage allows you to bring a multitude of content, images, videos, shapes, text, documents into one central place where your lessons can be created and then presented and interacted with the wide selection of interactive tools.

3.1 Setting a background

Newline Engage comes with a selection of starting backgrounds and subject backgrounds or its very easy to add your own customer picture, the options for adding a background can be find on the right hand side preferences settings section of the preparation mode.

You can choose to select from the image library, from the subject gallery orto choose your own image as a background.

Choose your own image as a background

3.2 Adding text

Select the text icon from the main toolbar.

Then click on the canvas where you would like the text to be placed, you can edit the text parameters using the Format tab on the right hand side of the screen.

3.3 Adding shapes

Select the shape tool icon from the main toolbar.

Select the shape required from the options available, the parameters for the shape can be customised using the Style tab on the right hand side of the screen.

You can also add text into any shape by clicking on the shape and starting to type below you can see we have now created labels for the planets

3.4 Adding images to the canvas

Select the resource icon from the main toolbar and select the images you would like to insert.

۰ در

Resource tool icon

These are then added to the whiteboard canvas and can be moved and resized with the mouse image styles and filters can be added from the right hand style tab.

3.5 Adding video to the whiteboard canvas

Select the resource icon from the main toolbar and select the video you would like to insert the following formats are supported.

Resource tool icon

File formats supported

The video will be inserted onto the canvas, playback options can be selected in the style tab.

3.6 Arranging objects on the stage

Objects on the stage can be moved around, and resized using the mouse, the ordering and alignment of objects can be manipulated using the Layout tab on the right hand of the canvas.

Or by right clicking on the object or selecting the 3 edit dots on the object.

4. OPENING AND SAVING YOUR FILES

4.1 Opening Newline Engage files

Select the "File" menu command and then select "Open" you can then navigate to where your files are stored and open them from here, the newline file format is called .hhtx this also means you can bring in files from the Android whiteboard app included with your panel.

4.2 Importing other file formats

Newline engage supports the direct import of a wide variety of file formats to make it easy for you to work with your existing lesson resources,

.ppt and .pptx - Microsoft PowerPoint files .iwb - interactive white board the common file format for all whiteboard software .notebook - smart notebook .flipchart - promethean flipcharts .pdf - adobe pdf files

File	Edit	1	B	5	¢
N	ew			Ctrl	+N
0	pen			Ctrl	+0
In	nport				
Sa Sa Q	ave ave As R Coc	i le Sl	hare	Ctrl	+S
R	ename	е			

4.3 Saving your lesson

Newline engage allows you to save your content in the following formats, select the save icon or the "Save" option in the "File" menu.

Save icon

Courseware - .hhtx the native format for newline engage

PDF - .pdf the Adobe acrobat file format

PNG - .PNG image file

IWB - .IWB the internationally recognised common file format for whiteboards

5. SHARING YOUR LESSON

Newline engage also supports the quick sharing of files using a QR code to allow them to be directly and quickly saved to a mobile device.

Selecting the QR code option will allow you to select which pages you want to share as well as the format you want to share them in, options include .PNG (Image File) .JPEG (Image File) .PDF (Adobe acrobat).

QR Code Share			×
Share pages	All	~	
Fil	e Name	Untitled	
	Format	PNG	~
		Cancel	Share

After selecting the format required a QR code will be displayed which can be scanned to download the file directly to your mobile device.

6. MAIN TOOLBAR / PREPARATION MODE

6.1 Add Page

This adds a blank page to the whiteboard canvas, pages can be moved up and down in the page sorter by selecting and dragging them.

+

Add page tool

6.2 Zoom

This allows you to zoom in or out of the canvas this is useful when the canvas has grown in size and you want to view everything on one page.

134%	\sim

Zoom tool

6.3 Screen Format

This allows you to select the screen format this could be useful if you want to display your content in a format, options are 16:9 -4:3 - 16:10.

6.4 Move

This allows you to move around the canvas and expand it from what is visible on the screen.

6.5 Reset

This resets the whiteboard canvas to its original starting position.

6.7 Select Mode

This allows you to select and interact with menu and canvas objects.

This allows you to ink on the whiteboard canvas with a variety of pens.

Select tool

Pen tool

6.8.1 Standard pen

This allows you to move around the canvas and expand it from what is visible on the screen.

6.8.2 Shape pen

The shape pen will automatically turn hand drawn shapes into, lines, squares, circles, triangles offering option for colour and line thickness.

6.8.3 High lighter pen

Highlight text and images with this pen, offering options for colour, thickness and transparency.

Style Color Image: Color <

6.8.4 Calligraphy pen

Stylised pen offering options for, colour, thickness and line style to create a calligraphic effect.

6.8.5 Pattern pen

Allows you to draw with with a pattern, offering options of some preset patterns and the ability to add your own images, supports the following formats.

6.8.6 Paint brush

This pen makes your ink look like its been painted on the canvas, offering options for colour and thickness.

6.8.7 Stamp

Offers the ability to stamp images / emojis onto the canvas, offering options for preset images and the ability to add your own images, supports the following formats.

¥ .

6.8.8 Chalk

Simulates chalk on a blackboard effect, offering options for colour and chalk thic-kness.

6.8.9 Handwriting recognition

Converts hand written ink into text, offering options for colour, font, and transfer times, supports the following languages. English, French, Dutch, Spanish, Japanese, Korean and Chinese.

6.8.10 Laser ink pen / Only available in presentation mode

Offers the ability for the pen drawn ink to flash, offering options for colour, and blink time.

6.9 Eraser tool

This tool is used to erase any ink drawn on the whiteboard canvas, you can adjust the size of the eraser, erase only a certain region on the screen, erase all ink on the page, or clear all the page contents.

6.10 Shape tool

The shape tool allows you to add a wide selection of lines and shapes quickly to the whiteboard canvas, you are able to adjust shape colour, border colour, border style, border width, and shape transparency after the object has been added to the canvas, you can also add text into a shape.

6.14 Other Whiteboard Tools

A number of other tools are available in the software these can be launched from the tools icon.

6.14.1 Print Screen

Enables the teacher to grab an image of what is happening on the whiteboard canvas either as a full screen or a partial screen capture and then save the image back to the canvas or to the desktop

6.14.2 Record

Allows you to record the lesson and then edit and playback later

Tools icon

Print Screen tool

Record tool

6.14.3 Curtain

This creates a curtain that covers the whiteboard canvas content underneath can be revealed by tapping the "x" on the screen.

The example below shows how you could use this in a lesson by adding the curtain to your slide in presentation mode so when you start the screen is covered by a curtain.

6.14.4 Ruler / Set Squares / Protractors

Provides a number of interactive tools that can be used on the whiteboard canvas.

6.14.5 Compass

An interactive compass which can be placed on the canvas and used to draw circles and explain angles.

261% × 16:9 × +♀+ ↔ ↔ ✓ Т \Diamond Ð 3 Ø 5 ođ ¥ **** ÿ. Slide Background Color Patterr Image Library \otimes Subject 6 Custom Picture Reset Apply to All $\overline{\mathbf{O}}$ 0

6.14.6 Google image search

Goggle images search allows you to search for images to add to the canvas.

6.14.3 Curtain

This creates a curtain that covers the whiteboard canvas content underneath can be revealed by tapping the "x" on the screen.

The example below shows how you could use this in a lesson by adding the curtain to your slide in presentation mode so when you start the screen is covered by a curtain.

6.14.4 Ruler / Set Squares / Protractors

Provides a number of interactive tools that can be used on the whiteboard canvas.

6.15 Some additional tools available in presentation mode

6.15.1 Clock

This tool gives you the options for 3 clock types, time, countdown, stopwatch these sit over the whiteboard.

Ö
Clock tool

In the example below a clock has been added to the canvas

6.15.2 Spotlight

The spotlight tool can be very useful for highlighting content on the screen, when launched you have options to make the highlighted section darker or lighter, change the size of the spotlight and change the shape from circle to square.

6.15.3 Magnifier

This handy tool allows you to zoom in on a section of the canvas to look into objects in more detail.

6.15.4 Subject specific content

Newline Engage contains a wide resource of subject specific content that is easy to add to your whiteboard canvas over 130 pieces of content is available.

Maths

A wide range of maths symbols and shapes, as well as an interactive equation editor and interactive graphing tool.

Subjects icon

Example of the interactive graphic tool

Physics

A wide range of physics symbols and shapes some of which can be interacted to change properties such as levels of liquid in a container.

Examples of physics objects added to a whiteboard canvas where elements have been adjusted to create different example.

Chemistry

A wide selection of chemistry objects some of which can be interacted with and example is to be able change levels of liquid in a container.

Examples of using the chemistry objects to create different scenarios

7. ADDING LINKS TO AN OBJECT / PREPARATION MODE

By right clicking on an object or clicking on the object and selecting the 3 edit dots you are able to create the following links that are opened when the the object is selected in presentation mode.

7.1 Files

This allows you to link to a file saved on the teachers laptop or desktop the file will open when the object is clicked on.

Documents:

Any document file can be linked to, the application the document was created in will launch when selected.

File	Please select the file from U	disk:
🥭 Website	Please select file	Select
TText		
🗐 Page		

Audio formats supported

7.2 Website

This allows you to link to a file saved on the teachers laptop or desktop the file will open when the object is clicked on.

7.3 Text

Enter text to be displayed when the object is clicked on.

7.4 Page

Jump to a selected page in the whiteboard file when the object is clicked on.

7.5 Tool

Launch a whiteboard tool when the object is clicked on for example, spotlights or curtain to

8. COVER LAYER FOR OBJECTS / PREPARATION MODE

By right clicking on an object or clicking on the object and selecting the 3 edit dots you are able to add a cover for this object that can be erased using the eraser tool when in presentation mode, in the example below a cover layer is added to the label under the kangaroo which can then be gradually erased when the lesson is in presentation mode.

9. GOOGLE DRIVE LOGIN

There are two methods of logging into your google drive to access resources.

9.1 QR Login - Presentation Mode

By selecting the account login icon in the bottom right hand corner.

You are given a QR code to scan with your phone or the option to manually login using the "sign in" menu option, this will give you access to files and resources on your Google drive

9.2 QR Login - Preparation Mode

You can access content on your google drive through the resources icon on the main menu toolbar.

This will give you the option to login via QR code or manually enter your login details.

When you have successfully logged in you will see a green tick mark and your google account details, you can then load whiteboard files and insert images and videos from your google drive.
